the program. The valuation must include a recommended contribution rate needed for the system to achieve and maintain an amortization period that does not exceed 30 years.

(b) On the basis of the valuation, the actuary shall make recommendations to the governing body of the public retirement system to ensure the actuarial soundness of the system. This information must be included either in the actuarial study or in a separate report made available as a public record.

If no future payments are due, the retirement system may recover the overpayment

in any manner that would be permitted for the collection of any other debt.

(1) how the modified correction was calculated;

(2) a brief explanation of the reason for the modification; and

(c) The projection of the effect of the bill or resolution on the actuarial soundness of the system must be based on a computation of advanced funding of actuarial costs.
