children with special health care needs, any aspects of health care delivery under the state Medicaid program assigned to the department by law or by the commission, and the part of any other department program concerned with the department's responsibility for the delivery of health care services.

(b) The department shall integrate the functions of its different health care delivery programs to the maximum extent possible, including integrating the functions of health care delivery programs that are part of the state Medicaid program with functions of health care delivery programs that are not part of the state Medicaid program.

(c) At a minimum, the department's integration of the functions of its different health care delivery programs must include the integration within and across the programs of:

(1) the development of health care policy;

(2) the delivery of health care services, to the extent appropriate for the recipients of the health care services; and

(3) to the extent possible, the administration of contracts with providers of health care services, particularly providers who concurrently provide health care services under more than one contract or program with the department.

(d) One of the primary goals of the department in integrating the delivery of health care services for the benefit of recipients shall be providing for continuity of care for individuals and families, accomplished to the extent possible by providing an individual or family with a medical home that serves as the primary initial health care provider.

(e) One of the primary goals of the department in integrating the administration of contracts entered into by the executive commissioner or the executive commissioner's designee on behalf of the department with providers of health care services shall be designing an integrated contract administration system that reduces the administrative and paperwork burden on providers while still providing the department with the information it needs to effectively administer the contracts. The department's integration of contract administration must include:
(1) the integration of the initial procurement process within and across programs, at least in part by efficiently combining requests for bids or proposals within or across programs to the extent it reduces the administrative burden for providers;

(2) the establishment of uniform contract terms, including:

   (A) contract terms that require information from providers, or that prescribe performance standards for providers, that could be made uniform within or across programs while remaining effective as contract terms;

   (B) the establishment of a procedure under which a contractor or a person responding to a request for bids or proposals may supply the department with requested information whenever possible by referencing current and correct information previously supplied to and on file with the department; and

   (C) contract terms regarding incentives for contractors to meet or exceed contract requirements;

(3) the integration of contract monitoring, particularly with regard to monitoring providers that deliver health services for the department under more than one contract or under more than one department program; and

(4) the integration of reimbursement methods:

   (A) particularly for a provider that delivers health services for the department under more than one contract or under more than one department program; and

   (B) including the application across programs of the most effective and efficient reimbursement technologies or methods that are available to the department under any of its programs.

(f) The department shall examine the extent to which the department could integrate all or part of its health care delivery programs into a single delivery system.

(g) If a federal requirement that the federal government may waive restricts the department's integration efforts under this section, the department may seek a waiver of the requirement from the federal government. If the waiver affects a program for which another state agency is designated the single state agency for
federal purposes, the department shall request the single state agency to seek the waiver.

(h) The department may not integrate health care delivery programs under this section in a way that affects the single state agency status of another state agency for federal purposes without obtaining the approval of the commission and any necessary federal approval.

(c) The department may award a grant, enter into a contract, or otherwise engage an individual or a group or association of individuals to perform professional services selected on the basis of competitive proposals submitted for the grant, contract, or services to be performed. The department may also make the selection on the basis of:

(1) demonstrated competence and qualifications for the type of professional services to be performed; and

(2) whether the fees for the professional services to be performed are fair, reasonable, and consistent with and not higher than the usual and customary fees for the services to be performed and do not exceed any maximum provided by state law.

(d) The department may award a grant, enter into a contract, or otherwise engage an individual or a group or association of individuals to perform professional services without complying with Subsection (c) if the executive commissioner by order determines that an emergency exists that necessitates the use of different procedures.
