(2) nurse satisfaction with the practice environment is in large measure determined by providing an adequate level of nurse staffing based on research findings and patient intensity;

(3) nurse satisfaction and patient safety can be adversely affected when nurses work excessive hours; and

(4) hospitals and nurses share a mutual interest in patient safety initiatives that create a healthy environment for nurses and appropriate care for patients.

that are:

(A) based on multiple nurse and patient considerations; and

(B) determined by the nursing assessment and in accordance with evidence-based safe nursing standards;

(3) include a method for adjusting the staffing plan for each patient care unit to provide staffing flexibility to meet patient needs; and

(4) include a contingency plan when patient care needs unexpectedly exceed direct patient care staff resources.

(c) The hospital shall:

(1) use the official nurse services staffing plan:

(A) as a component in setting the nurse staffing budget; and

(B) to guide the hospital in assigning nurses hospital-wide; and

(2) make readily available to nurses on each patient care unit at the beginning of each shift the official nurse services staffing plan levels and current staffing levels for that unit and that shift.

(e) The committee shall meet at least quarterly.

(f) Participation on the committee by a hospital employee as a committee member is part of the employee's work time, and the hospital shall compensate that member for that time accordingly. The hospital shall relieve a committee member of other work duties during committee meetings.

(g) The committee shall:

(1) develop and recommend to the hospital's governing body a nurse staffing plan that meets the requirements of Section [257.003](#);

(2) review, assess, and respond to staffing concerns expressed to the committee;

(3) identify the nurse-sensitive outcome measures the committee will use to evaluate the effectiveness of the official nurse services staffing plan;
