The obligations may be issued in multiple series and issues from time to time in an aggregate amount not exceeding the maximum obligation amount. The obligations may be issued on and may have the terms and provisions the commission determines appropriate and in the interests of the state. The obligations may be issued as long-term obligations, short-term obligations, or both. The latest scheduled maturity of an issue or series of obligations may not exceed 30 years.

Obligations may be additionally secured by and payable from credit agreements. The commission may pay amounts due on the obligations from discretionary money available to it that is not dedicated to or appropriated for other specific purposes.

(c) The commission may create within the fund accounts,

reserves, and subfunds for purposes the commission finds appropriate and necessary.

(c-1) If proceeds of obligations are to be used for a project located in the planning area of a metropolitan planning organization, the project must first be approved by the policy board of the metropolitan planning organization.

(1) to pay all or part of the costs of relocating, constructing, reconstructing, acquiring, improving, rehabilitating, or expanding rail facilities owned or to be owned by the department, including any necessary design, in the manner and locations determined by the commission that according to conclusive findings of the commission have an expected useful life, without material repair, of not less than 10 years;

rail line will be located have first approved the relocation.

(e) Long-term obligations in the amount proposed to be issued by the commission may not be issued unless the comptroller projects in a comptroller's certification that the amount of money dedicated to the fund pursuant to Section 49-o(d), Article III, Texas Constitution, and required to be on deposit in the fund pursuant to Section 49-o(e), Article III, Texas Constitution, and the investment earnings on that money, during each year of the period during which the proposed obligations are scheduled to be outstanding will be equal to at least 110 percent of the requirements to pay the principal of and interest on the proposed long-term obligations during that year.

(j) A comptroller's certification under this section must be based on economic data, forecasting methods, and projections that the comptroller determines are reliable. In determining the principal and interest requirements on outstanding and proposed obligations, and subject to the express limitations of this subchapter and Section 49-o, Article III, Texas Constitution, the comptroller shall rely on the assumptions included in the resolutions authorizing the obligations for the computation of debt service.
